

Big Business 10.19 ReadMe

August 31, 2017

Welcome to Big Business 10.19!

Big Business 10.19 adds new features and fixes, including many improvements for remote Clients and using Cloud Server.

New in Big Business 10:

- new Database with state-of-the-art features
- new PDF Emailer for Windows 10 and Outlook 2016
- new Custom Form tool with Zoom
- new Toolbars for simpler, cleaner navigation
- new Retina Display support for super-crisp text and icons
- new Server for Windows is 64-bit for unlimited memory

Supports any mix of current Macs and Windows PCs:

- Support for Windows 10 Creators Update
- Certified for macOS Sierra
- Certified for Mavericks, Yosemite, El Capitan, and Sierra
- Certified for Windows 7, 8.1, and Windows 10 Anniversary
- Certified for Windows Server 2008 R2, 2012 R2, and 2016

Updating or Upgrading?

To Update from an earlier release of Big Business 10, download and install the new Big Business Server and on startup open your Data File. Updating requires current Support.

To Upgrade from an earlier version of Big Business, download and install the new Big Business Server and on startup open your Data File. Big Business 10 will automatically Convert your Data File, which may take a few minutes. Then, install new Big Business Clients and connect. Upgrading requires new Registration.
